

# Refurbishing a Helmet

By Pat

# Getting the helmet

Last imp sesion i did a project on the history of helmets and was given some helmets to use as examples but i was allowed to keep one of those helmets and i decided that this was going to be my next project.

# Research

I began researching this helmet starting with its company the B.F. McDonald Co. it was a helmet manufacturing company that produced helmets for all sorts of things but this specific helmet was a transition phase between civilian and war production sharing many similarities to a logging helmet but being produced for the army.

# Refurbishing

To refurbish this helmet i sanded the rust off and either bumped out the dent or dented out the bump spray painted back on the blue coat and painted back the white seven

# Product

The end result was a refurbished usable helmet from the ww2 era that i planned to keep
